Subject: Re_ discret rad sources in Hunters Point South Basin seds

Importance: High

Ned:

Yes it does. Radium 226 devices were detected in the low tide mud flats just beyond the shoreline of the Parcel E landfill. The Navy has a rad survey report that can substantiate this.

Steve,

I think I remember hearing that some radium dials have been found in the sediments off Hunters Point Parcel E (the landfill). Does that ring a bell with you?
